Subject: Call for Contributing Technical Papers / Sponsoring / Advertising in the
Souvenir / Nominating participants for the one day National workshop on “Failure
Analysis of Boiler Tubes”.

Dear Sir / Madam,

Failure of Boiler Tubes is one of the most significant causes of forced outages in
thermal power plants. This problem is of utmost importance to plant operators,
maintenance engineers, fabricators and suppliers. With challenges and opportunity
ahead and worldwide interest, the Society for Failure Analysis Mumbai Chapter in
association with PHCET Rasayani is organizing a one day National Workshop on
“Failure Analysis of Boiler Tubes” on Saturday, August 31, 2019 to exchange
technical information to understand, identify and mitigate boiler tube failures
through research and development.

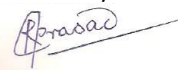

The workshop consists of invited and contributory lectures by the faculty drawn
from academic institutes, research establishments and industries who have worked
extensively on different aspects of failure analysis of boiler tubes.

In order to achieve our objectives, we need active participation of Industries,
Research and Educational Institutes. I therefore request you to sponsor / advertise
in the souvenir / nominate participants for the workshop. I am enclosing the
brochure that contains all the details of the workshop and look forward to your
positive response.

Prior confirmation of your participation can also be done by e-mail. Kindly send
application form along with draft / cheque drawn in favour of “Pillai Consultancy &
Research Projects” payable at Mumbai.

With warm regards,

Sincerely

Prof. R.C. Prasad
